Assessment Specialties

Our assessment specialties include:

- Autism Spectrum Disorder (ASD)
- Attention-Deficit/Hyperactivity Disorder (ADHD also formerly known as ADD)
- Specific Learning Disorder
- Language Disorder (i.e., comprehension problems)

Psychodiagnostic Assessment

It all starts with getting the right diagnosis. Many developmental conditions present with multiple symptoms that look similar. Thorough testing ensures that the right condition is being treated. We go beyond filling out simple checklists by getting data/information that gives us a thorough picture of your current functioning. We get you results within weeks, sometimes even the same day. We realize that you can receive your treatment once we give you a report with the right diagnosis.
